Subject: GE Aviation Evendale, OH

Todd, as mentioned in the 10/9/15 progress report, the Groundwater CMOs interim report was anticipated to be submitted in December 2015. This report is currently undergoing revision and review and is proposed to be submitted to you during first quarter 2016.

Also, as mentioned in the 10/9/15 progress report, GE is continuing preparation of a work plan for an on-site vapor assessment for Buildings 500, 700, 703, and 800. We are currently conducting pre-assessment activities to identify site conditions such as building floor construction, utilities, occupancy, and chemical inventories to assist in scoping for work plan development. We anticipate submitting the on-site vapor assessment work plan to USEPA during first quarter 2016.

We trust that this revised schedule is acceptable to you. Please let us know if you have any questions or comments.

Regards,

Rick

Richard L. Boone, CPG, CHMM
